Sustainability for *Every* Company.

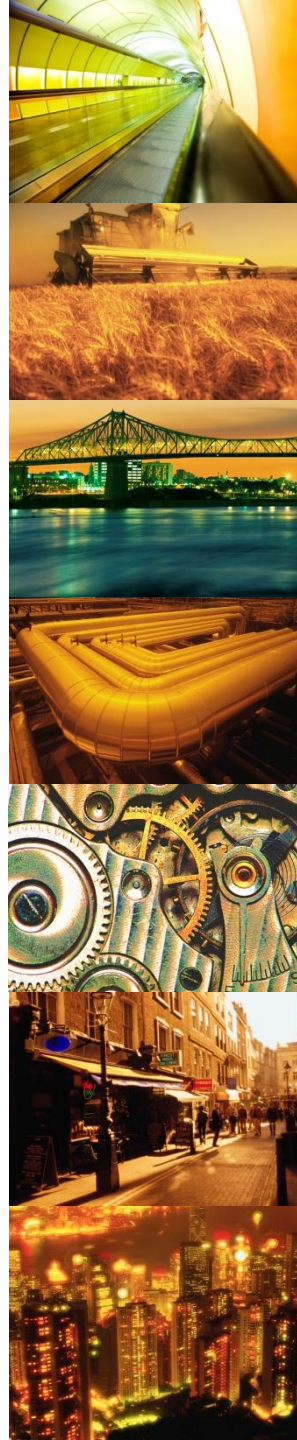

Welcome

Hello -- and welcome to the training materials page for SSC Green Auditors. If this is your first time through the training, we suggest that you start at the beginning (Part 1) and work your way to the end. It is about 15 hours of material (including "homework" assignments) so pace yourself.

If you have already gone through the training, feel free to refresh yourself by poking around as you see fit. Remember to always check the templates page before you conduct an SSC Green Audit to ensure that you have the most up-to-date versions of tools and documents.

We would absolutely love for you to ask questions and engage with other Green Auditors in the discussion forums. You don't have the benefit of three days of intense face-to-face interaction with us and your fellow Green Auditors, so take advantage of the online counterpart.

Curriculum Outline – Part 1 to 4

Part 1 – Introduction

This section provides a general background on SSC, and explains the Green Auditor certification and methodology.

Part 2 – Licensing Fees

This section discusses the SSC Green Auditor licensing fees and payment terms.

Part 3 – Components of a Standard SSC Green Audit

This section provides an overview of a typical Green Audit client, and explains the five standard components of a typical SSC Green Audit, plus the optional sustainability action plan.

Part 4 – Variations to the SSC Green Audit

This section explains common variations in the SSC Green Audit and when it is NOT appropriate for clients.

Curriculum Outline – Part 5 to 8

Part 5 – The Employee Survey

This section explains the employee survey, including questions about attitudes and awareness and environmental metrics (like commuting patterns) that will inform the carbon footprint analysis.

Part 6 – The Facility Data Collection Spreadsheet

This section covers the Facility Data Collection Spreadsheet, including how and when to use national averages and estimates.

Part 7 – The Carbon Calculator (Part 1)

This session provides a general introduction to the SSC carbon calculator, including its background, application, and limitations.

Part 8 – The Carbon Calculator (Part 2)

This session goes through an actual carbon calculation demonstration, reviewing how to correctly analyze data and enter it into the carbon calculator spreadsheet.

Check – In with SSC

Check In #1

Before you go on, take a minute to make sure you understand the sections that we've previously covered.

Curriculum Outline – Part 9 to 12

Part 9 – The Morning Workshop

This session reviews the morning workshop -- the first activity of your onsite visit.

Part 10 – Facility Walk-Through

This session covers the facility walk-through, a tour of the client's operations after the morning workshop.

Part 11 – Afternoon Wrap-Up

This session reviews the final component of the onsite visit -- the afternoon wrap-up presentation.

Part 12 – Final Audit Report

This session goes over the final audit report, and explores how to make good recommendations and how deep to go in this Phase I project.

Check – In with SSC

Check In #2

Before you go on, take a minute to make sure you understand the sections that we've previously covered.

Curriculum Outline – Part 13

Part 13 – Marketing the SSC Green Audit

This session talks about pricing strategy, tools that SSC has developed to support your business development, and how to get a sample contract and scope of work.

On completion of the 13 Part series you become a Certified SSC Green Auditor!

Welcome to the SSC Certified Green Auditor Network!
